

# verify.college

## Know-your-student (KYS)

---

Universitat Politècnica de Catalunya – BarcelonaTech

# Table of contents

1. Introduction
2. Architecture
3. Components and Services
4. What changed since the project proposal?
5. Takeaways

# Intro

---

# Demonstration

Want to try it yourself? Go to [verify.college](https://verify.college)!

Otherwise, we have recordings 📺

➡ Success on desktop

➡ Failure on desktop

➡ Success on phone

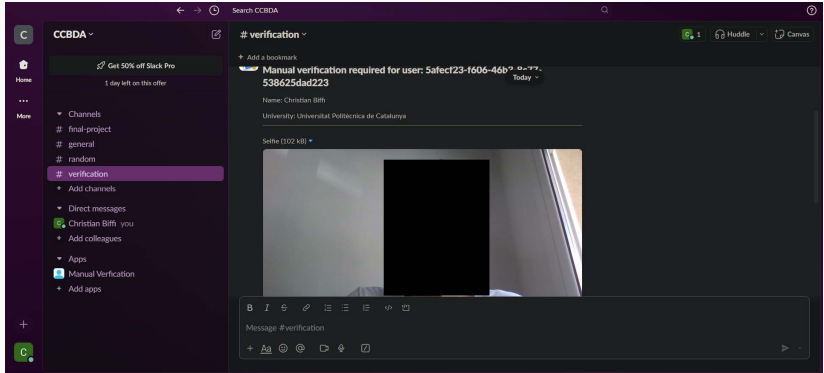

➡ Failure on phone

And for admins only, we can check the verification attempts! 🔒

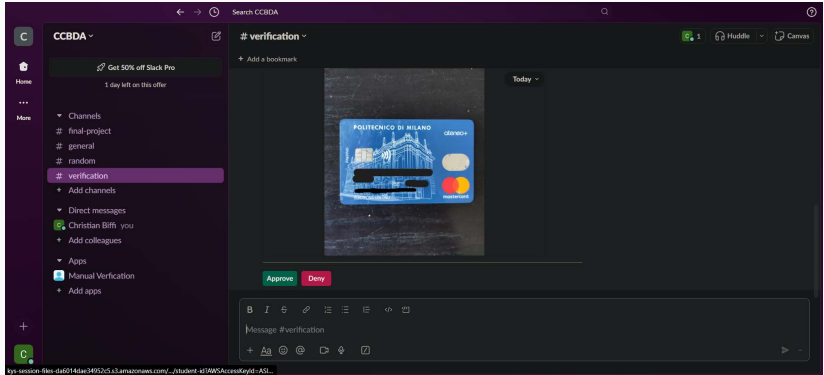

➡ Audit page

# Manual Verification i

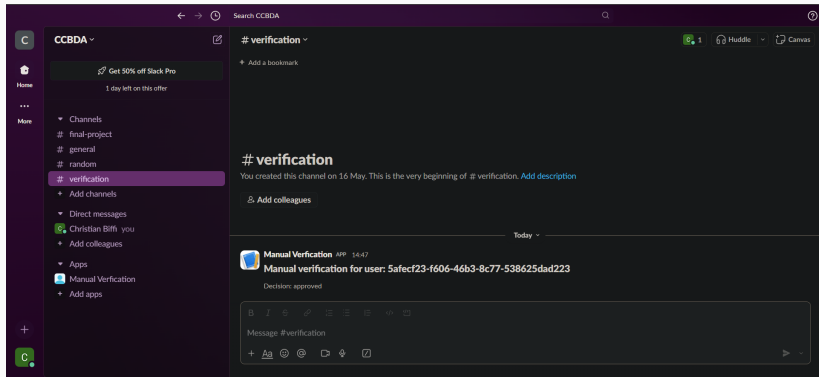

We even made a *Slack Bot*! 🤖

# Manual Verification ii

# Manual Verification iii

# Architecture

---

# Guiding principles

---

- Serverless
- Event-driven and asynchronous
- Infrastructure-as-Code (IaC)

# Verification Flow

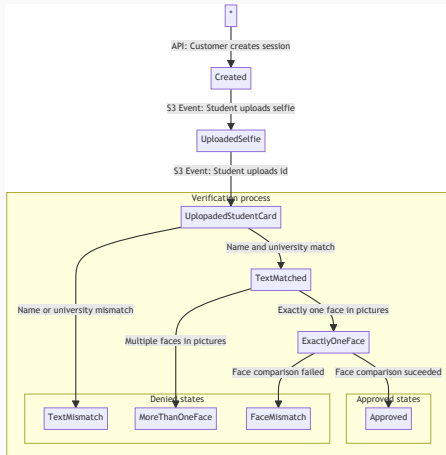

Figure 1: State diagram of the verification flow.

# Architecture

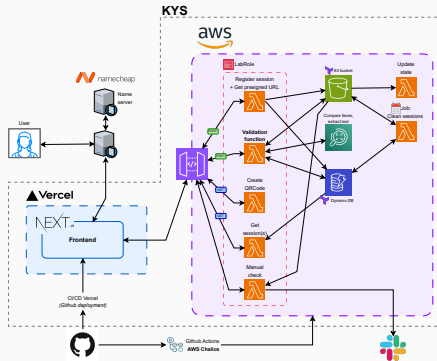

Figure 2: The implemented architecture.

# Components and Services

---

- Vercel
- Amazon API Gateway
- Amazon Lambda Function
- Amazon S3
- Amazon DynamoDB
- Amazon Rekognition
- Amazon Cognito

- Docker
- Terraform
- Github
- Github Actions

What changed since the project proposal?

---

# Limitations

- Too many restrictions on the AWS Learner Lab 🤖
- We got banned from the AWS Learner Lab! 💪
- We used Vercel instead of Amplify 🚀

# Improvements

```
@app.route(
    "/session/{id}",
    methods=["GET"],
    content_types=["application/json"],
)
def get_session(id: str):
    ...

@app.on_s3_event(
    bucket=APP_BUCKET_NAME,
    events=["s3:ObjectCreated:*"],
)
def handle_s3_event(event):
    ...
```

## Takeaways

---

## Main takeaways

# Main takeaways

- Explore ecosystems beyond AWS! 

# Main takeaways

- Explore ecosystems beyond AWS! 
- Pre-signed URLs for the win! 

# Main takeaways

- Explore ecosystems beyond AWS! 
- Pre-signed URLs for the win! 
- IaC = Easier debugging & teamwork! 

# Main takeaways

- Explore ecosystems beyond AWS! 
- Pre-signed URLs for the win! 
- IaC = Easier debugging & teamwork! 
- **chalice** rocks for lambdas & APIs! 

# Main takeaways

- Explore ecosystems beyond AWS! 
- Pre-signed URLs for the win! 
- IaC = Easier debugging & teamwork! 
- **chalice** rocks for lambdas & APIs! 
- Go async first, save time later!
